Reason for allowance

The following is an examiner's statement of reasons for allowance: in view of the amendment filed on 12-27-04, the prior art reference of records (US Pat. 6,271,703) fails to teach or fairly suggest a voltage tolerant circuit for protecting an input buffer comprising: a p-channel transistor having a first terminal coupled the pad I/O, a gate coupled to Ring Vdd, and a second terminal coupled to a first terminal of an n-channel transistor as called for in claims 8 and 15. Therefore, claims 8, 10-15 and 17-20 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
